

SIDE SHIELD SPECTACLE FRAME/SAFETY GOGGLE FITTING

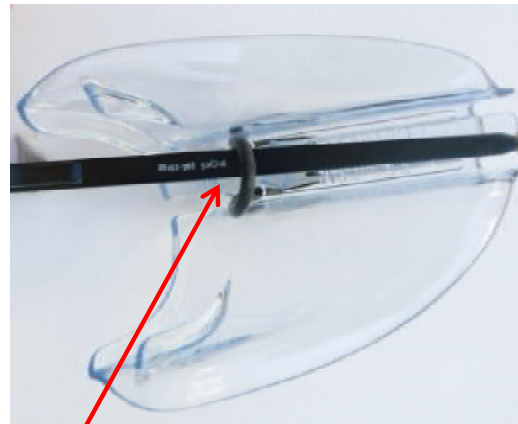

Pix #1 Remove red rubber band as they are no longer needed.

Pix #2 N.B. There are right and left sided fittings. The shorter rim goes to the top of the glasses rim.

Pix #3 Create a small loop on the inside of the side shield as pictured.

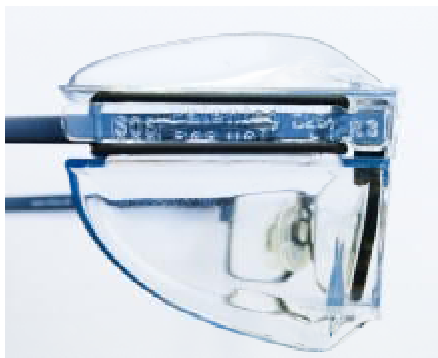

Pix #4 The tip end of the glasses arm fits under this retaining loop.

Pix #5 On the outside of the safety shield, stretch the retaining loop so that it hooks over the end stub. Now push the frame temple tip along the groove and under the retained at the stub end.

Pix #6 Looking from the inside, it should look like this.

Pix #7 Looking from the outside side, it should finish looking like this.

Pix #8 From the front, the flap cover should cover the front of the frame where it joins the arm
